

# DEPUTY MAYOR'S REPORT

JULY 5, 2011

There have been recent articles in the paper regarding the Oyster Creek Nuclear Plant. I would like to direct our Administrator, Dave Breeden to formalize a Resolution that Barnegat Township be involved in any decision to de-commission, re-core or change over to another fuel source. Since we have also supported the plant, shared the Tritium and other releases, we should also share in some of the tax benefits.

.....

We have paid particular attention to the Sub-Code fees to make sure that our permitting fees are resident friendly. We want to encourage our residents to improve their homes the right way.

.....

Just a quick, last, comment regarding the new softball field on Lower Shore Road. This field was way over due, and will serve the girls' softball teams, young adult and senior softball teams who will put the field into immediate and continued use. The money to pay for the improvements came out of the Recreation and open Space fund. This money can only be used for these two purposes and in NO WAY affects the tax rate.
