DEP

Flood Hazard Area Emergency Rule Permit By Rule for SFHA Construction on a Lagoon

- 1) Is the proposed structure a single family dwelling? Y or N
- 2) Is the proposed structure on a man made lagoon and not a natural waterway? Y or N
- 3) Is the structure being relocated landward or parallel to the MHWL (mean high water line) of the previously constructed structure footprint? Y or N
- 4) Is or was the previous structure habitable? Y or N
- 5) Does the bulkhead extend across the entire water frontage of the property? Y or N
- 6) Are wetlands absent from the area landward of the bulkhead? Y or N
- 7) Is the proposed driveway made of porous material, or pitched to drain onto permeable areas? Y or N
- 8) Is the lowest habitable floor being raised to at least one (1) ft above the BFE required for this lot, per the best available data maps for this lot? Y or N
- 9) Is there an existing municipal sewer on site? Y or N
- 10) Is all proposed construction set back at least 15 ft from the water ward face of the bulkhead? Y or N
- 11) Is silt fence proposed to be installed along the length of the bulkhead, with a 10 ft return on both sides until all construction is completed? Y or N
- 12) Are sub gravel landscape liners being used made of filter cloth or other permeable materials? Y or N
- 13) If the construction includes a pool, will backwash be discharged to an area other than the surface water body or wetlands? Y or N

If you answered no to any question, this project is not eligible for this Permit By Rule, and you must apply to the DEP for a permit to construct/reconstruct your home. If the only no is #10, obtain a certification from a professional engineer stating that upon completion, future bulkhead reconstruction can be accomplished within 18" of the existing bulkhead. In addition, record a deed restriction with the Ocean County Clerk, stating future bulkhead reconstruction shall be within 18" of the existing bulkhead (as measured from the water ward faces of both old and new bulkheads).
