## ATTACHMENT II ASSUMPTIONS AND LIMITING CONDITIONS

This appraisal is subject to the following assumptions and limiting conditions:

1. Title to the property is assumed to be good and marketable and the legal description correct.
2. No responsibility for legal matters is assumed. All existing liens, mortgages or other encumbrances have been disregarded and the property is appraised as though free and clear, under responsible ownership and competent management.
3. All sketches in this report are intended to be visual aids and should not be construed as surveys or engineering reports.
4. All information in this report has been obtained from reliable sources. The appraisers cannot, however, guarantee or be responsible for the accuracy of information furnished by others.
5. This opinion of value applies to land and improvements only. The value of trade fixtures, furnishings and other equipment has not been included with the value of the real estate.
6. The appraiser is not to be required, by reason of this appraisal, to give testimony or attendance in court in reference to the property appraised.
7. This appraisal report is prepared for the sole and exclusive use of the appraiser's client and the intended users as identified within the body of the report. It may not be used or relied upon by any other party without our written consent. We are not responsible for any unauthorized use of this report.
8. Possession of this report or a copy thereof does not imply the right of publication or use for any purpose by any other than the addressee without the written consent of the appraisers.
9. The appraisers are not required to give testimony or attendance in court by reason of this appraisal, unless prior agreements have been made in writing.
10. The distribution of the total valuation in this report between land and improvements applies only to the existing utilization. The separate valuations for land and building must not be used in conjunction with any other appraisal and are invalid if so used.
11. The land, and particularly the soil, of the area under appraisal appears firm and solid. Subsidence in the area is unknown or uncommon, but the appraisers do not warrant against this condition or occurrence.
12. Subsurface rights (minerals and oil) were not considered in making this appraisal.
13. The inspecting appraisers inspected the building involved in this appraisal report and damage, if any, by termites, dry rot or other infestations was reported as a matter of information and no guarantee of the amount or degree of damage, if any, is implied.
14. The comparable sales data relied upon in this appraisal is believed to be from reliable sources; however, it was not possible to inspect the comparables completely, and it was necessary to rely on information furnished by others as to said data, therefore, the value conclusions are subject to the correctness and verification of said data.
15. The appraisers have inspected, as far as possible, by observation, the land and the improvements thereon; however it was not possible to personally observe conditions beneath the soil or hidden structural components within the improvements, therefore, no representations are made herein as to these matters and unless specifically considered in the report, the value estimate is subject to any such conditions that could cause a loss in value. Condition of heating, cooling, ventilating, electrical and plumbing equipment is considered to be commensurate with the condition of the balance of the improvements unless otherwise stated.
16. Neither all nor any part of the contents of this report shall be conveyed to the public through advertising, public relations, news, sales or other media, without the written consent and approval of the authors, particularly as to valuation conclusions, the identity of the appraisers or firm with which they are connected or any reference to the Appraisal Institute.

17. Unless otherwise stated in this report, the existence of hazardous substances, including without limitation, asbestos, polychlorinated biphenyls, petroleum leakage, or agricultural chemicals, which may or may not be present on the property, or other environmental conditions, were not called to the attention of nor did the appraisers become aware of such during inspection. The appraisers have no knowledge of the existence of such materials on or in the property unless otherwise stated. The appraisers, however, are not qualified to test such substances or conditions. If the presence of such substances, such as asbestos, urea formaldehyde, foam insulation or other hazardous substances or environmental conditions, may affect the value of the property, the value estimated is predicated on the assumption that there is no such condition on or in the property or in such proximity thereto that it would cause a loss in value. No responsibility is assumed for any such conditions, nor for any expertise or engineering knowledge required to discover them. The client is urged to retain an expert in the field of environmental impacts upon real estate if so desired.
18. The appraisers are not considered experts with regard to compliance with the Americans with Disabilities Act (ADA) of 1991. Unless otherwise stated, no responsibility is assumed for any non-compliance with the provision of the ADA. The client is urged to retain an expert in the field of ADA assessment impacts upon real estate if so desired.
19. This appraisal report will be prepared for the exclusive benefit of the Client. It may not be used or relied upon by any other party. Any party who uses or relies upon any information in this report, without the preparer's written consent, does so at his own risk.
20. **The reader is cautioned and reminded that the conclusions presented in this appraisal report apply only as of the effective date(s) indicated. The appraiser makes no representation as to the effect on the subject property of any unforeseen event, subsequent to the effective date of the appraisal.**
