Technical Specifications

Material shall be in accordance with AWWA Specification B300-87 and shall contain a minimum of 12.5% available chlorine by weight. The product shall be delivered to facilities suitably designed for such purposes. Trucking containers shall be equipped with equipment necessary to enable pumping to existing Treatment Facilities. All vehicles making deliveries must be totally self-contained and not require any outside power from the delivery pump to Township Facilities: this includes power from a generator or a receptacle.

The product shall be shipped and delivered in thoroughly clean tank trucks. Trucks shall not be articulated because of site restrictions. No third party deliveries will be allowed.

Please email all pricing information to janetw@barnegat.net no later than noon, November 20, 2026.
